Telecom Major achieves 70% Savings in Bandwidth and Storage Costs

CLIENT PROFILE

The international Telecom giant is a publicly held company, it is the seventh most valuable brand in the world with over 350 Million customers in 30+ countries around the world. Our client's network allows people to share images and videos as soon as they're captured; to share thoughts and feelings as soon as they're created. And because we now do more than just mobile in many markets, more customers look to this Telecom major for great value in their fixed line and broadband services too.

THEIR CHALLENGES

The client was looking for a robust and reliable Business Service Availability Management and Process Automation solution which could enable the following:

- ➤ Real-time visibility on Business Service Continuity and Availability
- ➤ Bringing live multiple databases and applications at Recovery site within 4 hours of RTO and 2 hours of RPO during a disaster
- ➤ Maximum protection for their critical business services
- ➤ Proper bandwidth utilization
- ➤ Minimize or eliminate impact on production server
- ➤ Real time visibility into the health of the Recovery site
- ➤ Unified monitoring console to view all applications from a single window
- ➤ Reduced dependency on SMEs

OUR SOLUTION

Perpetuuiti deployed **Continuity Patrol™** to address the Business Service Availability and Automation Challenges faced by the client:

- ➤ Continuity Patrol™ enabled single unified dashboard providing complete and real-time business service visibility and availability
- ➤ Combining two powerful proven technologies i.e. IBM Global Mirror (GM) and Oracle Log shipping Integrated by Continuity Patrol™
- ➤ Storage based replication resulted in no impact production server performance
- ➤ Use of proven Oracle APIs for recovery/ applying archive logs using Continuity Patrol™
- ➤ Reduced BW as replication is through Global mirror, which compresses data
- ➤ BW reduction due to shipping only archive logs
- ➤ Ensuring minimum data loss through replication of Redo logs i.e. improved RPO
- ➤ Visibility into the availability of various applications through Unified Monitoring Console
UNIQUENESS OF THE DEPLOYED SOLUTION

- ➤ Oracle in standby mode gives guarantee for opening database
- ➤ Lesser storage requirement compared to full DB replication
- ➤ Automation of processes and parallel execution of multiple applications' workflows for quicker availability (RTO)
- ➤ Management dashboard for Recovery site health and proactive correction through BIA
- ➤ Automation of alerts and availability of various reports
- ➤ Automation of DNS/ NATing
- ➤ Recovery load balancing to prevent single point of failure of Continuity Patrol™ server
