Minimize the business impact of a cyber-incident by recovering quickly with an automated resiliency for reduced RTO

BACKUP | RESPONSE | AUTOMATED RECOVERY | POLICY FRAMEWORK

We help you move beyond just detection and protection to full recovery in order to achieve true Cyber Resilience
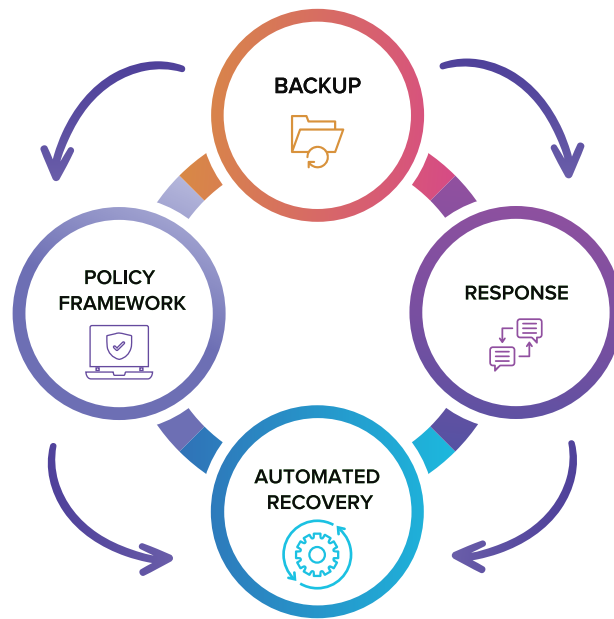

From malware, intellectual property theft and phishing to full-scale ransomware attacks — no organization is immune to cyberattacks. There has been a quick rise in ransomware attacks. Cybercrimes have been reported from government organizations, healthcare, technology companies, BFSIs, non-profits, educational institutions and many others. The cybercrime threat is real for every profession, industry, company and country.

Perpetuuiti uniquely combines cyber resiliency and organizational resiliency in one unified solution to enable organizations recover from Cyber and IT disruptions with the lowest recovery point objectives (RPOs) and fastest recovery time objectives (RTOs) in the industry, dramatically limiting data loss and downtime. It offers a holistic approach that combines cyber resilience, IT resilience and business continuity to ensure that organizations remain functioning after a cyber or an IT incident.

Perpetuuiti's 360º approach to Organizational Resiliency

- Disaster Recovery Automation
- Business Continuity Management & Planning
- Enterprise Risk Management
- Cyber Recovery
- IT & Network Resilience
- Governance & Compliance

Perpetuuiti Cyber Resilience Framework

How are we different?

We automate policy-based data protection with data security, so your organization can bounce back from a cyberattack.

Intelligent automation to respond with speed and scale to minimize risk.

Enhance your data view by deploying ML/ AI to make better and timely decisions.

Prevent data loss due to point-in-time recovery and get the most recent, clean data.

Respond faster with proactive alerts and notifications.

Get a centralized view of your data security posture, anomalies and risks — with actionable insights.

Integrated with OpenText, Dell, Cyber Vault, Rhym Technologies and many others to enable true cyber resilience.

MOVE BEYOND JUST BACKUP & PROTECTION
Take a larger view of recovering what matters the most!
